

Jérôme Haas — frontend developer from Zürich

I wrote my first line of code eight years ago and never stopped. What began as curiosity has become my craft and my mission: building things for the web that are fast, precise and quietly beautiful. Most of my waking hours belong to a keyboard.

The field moves fast, and I keep pace. Frontend is my main base. The rest of the stack is territory I keep claiming, one system at a time.

EXPERIENCES

// FROM 2018 → TODAY

goTom 2024 – TODAY	Frontend Engineer · Zürich At goTom I build the interfaces of a platform that digitalizes media sales — campaign management, CRM and order handling for the advertising industry. Frontend is my responsibility, from architecture down to the last easing curve. VUE.JS SCSS WEBPACK GULP JEST DOCKER
haas web solutions 2023 – TODAY	Founder · Zürich Demand for web solutions in my circle grew faster than expected, so I made it official. Under my own name I plan, design and ship projects for small and medium-sized businesses across Switzerland. NEXT.JS REACT ANGULAR EXPRESS LINUX NGINX
Calydo 2022 – 2023	Frontend Developer · Zug Calydo builds brand communication for its clients. I built the digital side of it. A steady rotation of client projects — new builds, relaunches and the quiet work of keeping existing ones alive. NEXT.JS CRAFT CMS WEBPACK GULP SCSS PHP
Arcmedia 2018 – 2020	System Administrator / Frontend Developer · Luzern My first job in tech. I started as a system administrator keeping the agency's infrastructure running, then moved to the frontend team — building forms and HTML emails that had to survive every mail client ever shipped. HTML SCSS JAVASCRIPT XML ZURB AZURE
Swiss Armed Forces 2017 – 2018	IT and Radio Specialist · Pristina Three months of training in Stans, then deployment to Kosovo as a radio and IT specialist with the KFOR mission. It taught me discipline, how to keep calm in a minefield and how to fix a radio in a storm. DISCIPLINE PUNCTUALITY ENDURANCE PRAGMATISM RESILLIANCE

HF Zug

2024 – TODAY

Dipl. Techniker HF Informatik · Student · Zug

A flyer on the 348 bus decided it. I'm now in my final year at HF Zug, focused on application development — part-time, alongside 80% at goTom. It won't be the last degree.

PYTHON NETWORKING LINUX DATABASES CYBER SECURITY C++**Codeworks**

2021 – 2022

Software Engineering Immersive · Graduate · Barcelona

Twelve weeks, full-time, JavaScript all the way down — around fourteen hours a day, seven days a week. Codeworks in Barcelona remains the hardest thing I have chosen to do, and the fastest I have ever grown.

JAVASCRIPT NODE.JS EXPRESS REACT ANGULAR MONGO DB

PRINCIPLES

// VALUES I LIVE

- 01 always show up
- 02 the trend is your friend
- 03 seperate the problem and the solution
- 04 work with what you have at hand
- 05 preparation is key
- 06 hard work pays off
